

PETS FIRST GROOMING SEDATION

There are 3 levels of sedation that may be used when sedating pets for grooming. A Veterinarian and Veterinary Technician closely monitor the pet, along with the Groomer, while the pet is under sedation.

LEVEL I – 9222 - \$80.00

A pre-anesthetic injection is given to the pet to help relax the pet and make the pet sleepy. This is reserved for clients who have been coming for a while and we *know* the animal, all new animals/clients start out at a Level II to ensure the groom gets completed. (BAG)

LEVEL II – 9223 - \$160.00

An anesthetic injection added to the pre-anesthetic injection if the pre-anesthetic injection does not sedate the pet enough for the groomer to be able to work with the pet. The addition of the second anesthetic injection will further relax the pet and make them sleepier than the pre-anesthetic injection alone. This is the Level required for all new animals to PFAC and Pet's First Grooming. After we establish a relationship, it can possibly move down to a Level I if we feel that will still be enough to complete the groom. (BAG + KAT)

LEVEL III – 9224 - \$320.00

Full anesthesia is administered, in addition to the pre-anesthetic and anesthetic injections. Anesthesia is administered, along with oxygen, via a mask. The pet will be completely asleep. This level of sedation is the same level that is used for surgical procedures. It is extremely rare for this level of sedation to be necessary for grooming. (BAG, KAT, ISO, O2)

PETS FIRST ANIMAL CLINIC ANESTHETIC AUTHORIZATION FOR GROOMING

Client Name _____ Pet Name _____

Phone number(s) where you can be reached today _____

Reason for Admittance: Sedation for Grooming Pet eaten in the last 8 hours? Yes No

Pet current on vaccinations? Yes No

(Written proof must be provided or Pets First will give the required vaccines at an additional cost.)

Anesthetic Authorization

Accept Decline (Please initial in the appropriate column, whether accepting or declining)

_____ ***I authorize LEVEL I SEDATION- \$80.00***

A pre-anesthetic injection administered to the pet to help relax the pet and make the pet sleepy.

_____ ***I authorize LEVEL II SEDATION- \$160.00 (Level I \$80 + Level II \$80)***

An anesthetic injection, given in addition to Level I Sedation, if Level I Sedation does not sedate the pet enough for the groomer to be able to groom the pet.

_____ ***I authorize LEVEL III SEDATION- \$320.00 (\$160 for Level III + Level I & II, \$320 total.)***

Administration of full anesthesia, in addition to Level II Sedation, if Level II Sedation does not sedate the pet enough for the groomer to be able to groom the pet.

_____ ***I authorize a Pre-anesthetic Blood Screen (additional \$112.00)***

A pre-anesthetic blood panel is recommended for any pet undergoing general anesthesia, but is especially important and necessary for those with previous health problems and those animals 8 years and older. The blood panel helps to detect anomalies with liver, kidneys, etc., that may make it unsafe for the pet to receive anesthesia.

_____ ***I would like IV catheter-fluid therapy (additional \$117.75)***

This option makes anesthesia safer and speeds up the recovery process. This may be necessary due to certain health concerns, lab results, and/or for patients 8 years and older.

I understand with any anesthetic procedure some risk is involved. Knowing this, I will not hold Pets First Animal Clinic or Pets First Grooming responsible for any complication experienced during the stated procedure. Anesthesia may not be administered depending on the outcome of an examination and/or laboratory results. I understand that all charges must be paid in full at the time of service and before my pet's release.
